HATCHER CAPITAL INVESTMENTS

Creating Financial Freedom

Who we are. What We Offer.

Hatcher Capital Investments was originally created to manage the Hatcher Family portfolio. We realized that many friends and associates wanted the same type of advice and counsel for their investments as well.

Our goal is to create financial freedom for our clients by having a total financial and estate planning plan in place for their family and the generations to come.

WHO WE ARE

Hatcher Capital Investments was started initially to manage the Hatcher Family portfolio. What we found was that we had many friends and associates who wanted the same type of advice and counsel for their portfolios.

HOW WE GET PAID

Hatcher Capital Investments makes their revenue in two ways. We charge an annual fee of no more than 1% for assets under management. Our other source of revenue is through fees or commissions paid from insurance products such as annuities or life insurance. With annuities and life insurance, the fees or commissions are paid by the insurance carrier instead of being deducted from your account.

TOTAL FAMILY PROTECTION PLAN

Our goal is to assist our clients in having a total financial and estate planning plan for their families wealth and the generations to come. We assist clients for planning for retirement, protecting their assets, providing coverage should they have a long term care event, disability, death, and estate planning to pass on their assets to their loved ones.
